

Peter Eremeev

pm.eremeev@gmail.com · peter-eremeev.github.io

EDUCATION

London School of Economics Sep 2026 – Jun 2027
MSc Econometrics and Mathematical Economics (incoming)

University of California, San Diego Sep 2024 – Jun 2026
B.S. Joint Mathematics–Economics
Mathematics Honors Program

RESEARCH INTERESTS

time series econometrics, nonparametric methods, macroeconomics

WORKING PAPERS

Nonparametric Spectral Tests for Stationarity in Nonlinear Time Series 2026
Honors thesis, advised by Danna Zhang.
A nonparametric test for stationarity based on the spectral density, accommodating nonlinear, non-Gaussian data-generating processes and retaining power against smoothly time-varying alternatives.

OTHER WRITING

Evaluating the Fed: How good are the forecasts of policy makers? 2025
With M. Chittineni, L. Xie, and C. Zhang.
Course paper, ECON 110BH (Honors Macroeconomics, Prof. Hamilton).
Authored Sections 3–5: data and methodology, results, and benchmarked performance.
Evaluates Greenbook forecasts against naive and AR(1) benchmarks; the Fed’s advantage erodes at long horizons, with one-year GDP errors nearly indistinguishable from the two-parameter autoregression.

RESEARCH EXPERIENCE

Independent Study Jun – Sept 2025
Supervisor: Prof. Danna Zhang — Time series analysis
Stationarity and linear processes; ARMA modeling and forecasting; estimation, diagnostics, and model selection. Informal introduction to spectral analysis.

Research Assistant, The Economic Research Lab, UC San Diego Mar – Jun 2025
Supervisor: Maddison Erbabian (PhD candidate, Economics) — Event study on educational spillovers from universities.
Built Python pipeline for automated geo-coordinate scraping via the Google Maps API. Constructed location database with crosswalks to household microdata. Verified and modified replication packages; ported R GIS objects into Python.

TEACHING EXPERIENCE

Academic Tutor, College of San Mateo 2022 – 2024
Tutored introductory microeconomics and statistics.

HONORS AND AWARDS

Provost Honors, UC San Diego 2024 – 2026
Paper accepted, Stanford Undergraduate Honors Symposium 2023

COURSEWORK

Mathematics: Real Analysis (MATH 140A/B), Probability and Stochastic Processes (MATH 180A/B/C),
Mathematical Statistics (MATH 181A/B), Linear Algebra (MATH 102)

Economics: Intermediate Microeconomics (ECON 100A/B/C), Macroeconomics A (ECON 110A), Honors
Macroeconomics B (ECON 110BH), Econometrics (ECON 120C)

SKILLS AND LANGUAGES

Programming: R, Python, Stata (basic), Git, $\text{\LaTeX}$
Languages: English, Russian
